Portfolio: likio3000.github.io/CV/portfolio.html

Self-taught developer based in Melbourne, focused on data engineering and Python. I build reproducible pipelines and analytical models, with data quality checks and tested recovery paths.

SELECTED DATA PROJECTS

DevPulse Data Platform | Python, SQL, DuckDB, dbt, ClickHouse

Built batch and streaming pipelines for public GitHub activity. A local reference run processed 2.5 million events; 99 Python tests passed. Code not publicly released.

Commerce CDC | Python, SQL, SQLite, SCD Type 2

Built an incremental warehouse with customer history, late-change repair and independent reconciliation. Thirteen tests cover recovery and correctness. Public source and synthetic demo.

NYC Taxi Data Engineering | Python, SQL, DuckDB, dbt

Built an auditable warehouse from 5.97 million source trips. Published 5.90 million in-scope trips; 14 dbt tests and eight quality checks passed. Code not publicly released.
