Portfolio: likio3000.github.io/CV/portfolio.html

Self-taught Python developer based in Melbourne. I build data pipelines, research tools and applications, with a focus on making the work understandable and testable.

SELECTED DATA PROJECTS

DevPulse Data Platform | Python, SQL, DuckDB, dbt, ClickHouse

Local batch and streaming platform for public GitHub events. Reference run: 2.5 million events; 99 Python tests passed in a clean environment. Code not publicly released.

VIC Energy Forecasting | Python, pandas, XGBoost, PyTorch

Three-stage study covering data preparation, model comparison and monitoring. XGBoost MAE 6,408 MWh versus GRU 6,414 MWh on the same 359 dates: a near-tie. Only the initial study is public.

NYC Taxi Data Engineering | Python, SQL, DuckDB, dbt

Built an audited warehouse from 5.97 million source trips. Loaded 5.90 million trips within the monthly scope; 14 dbt tests and eight quality checks passed. Code not publicly released.
